

SCHOOL OF ENGINEERING INDEPENDENT STUDY SUMMARY PROPOSAL

What is the subject matter covered in this course?

How will your work in this course be evaluated?

What are the course's objectives and how will they be met?

Is there a textbook being used in the course? What is it? What sections of the text will be covered?

ENGINEERING MAJORS ONLY

Will the study involve a significant design experience (at least 25% of the workload)? _____

If so, describe the design project(s) and list the Realistic Constraints and Engineering Standards that you expect to be incorporated in the design activity. Describe the Modern/Professional engineering tools that will be used (use additional space if needed).
